

Environmental & Energy Policy

Commitment

We, Gärtner GmbH, are a company of Gärtner Group and a leading service provider specialising in plant engineering and welding technology solutions. At Gärtner Group, minimising environmental impacts and continually improving energy efficiency in accordance with statutory requirements are cornerstones of our commitment to sustainability. We recognise our responsibility to preserve the environment for future generations and to minimise our environmental impact.

Principles

- Active environmental protection is a cornerstone of our corporate philosophy.
- Assess our significant environmental aspects and pursue the management objective of improving environmental performance.
- Ensure the safe storage and use of required materials and improve material efficiency.
- Reduce pollutant emissions to air, water and soil that may arise from our manufacturing processes.
- Evaluate the potential environmental impacts of our services.
- Promote awareness of environmental protection through transparent communication.
- Actively cooperate with interested parties to meet requirements in a timely manner.
- Continuously measure our management objectives and performance against defined Key Performance Indicators and implement the resulting measures to continually improve environmental and energy performance.

Commitment, responsibility and teamwork are essential to Gärtner Group in achieving its environmental objectives. Management therefore commits to:

- Providing the necessary means and resources.
- Fulfilling applicable compliance obligations.
- Ensuring continual improvement of company performance through the involvement of all employees, their representatives and partners.
- Continuously identifying and assessing risks and opportunities in order to minimise or eliminate risks and hazards and to realise opportunities.
- Defining and setting objectives.
- Providing leadership for the responsible implementation of our global Environmental Policy.
